Summary

Social research and community development professional with a Master's degree in Anthropology (Cum Laude, Universitas Indonesia) and extensive experience in social impact assessment, FPIC, stakeholder engagement, and social safeguards across forestry, carbon, and rural development projects. Proven expertise in leading multidisciplinary teams, conducting socio-economic assessments, facilitating participatory consultations, and developing evidence-based strategies that support ESG, sustainable development, and community empowerment. Strong analytical, project management, and cross-sector collaboration skills.

Experience

Researcher & FPIC Coordinator 03/2026 - 08/2026

Carbon Tide & Gaia Indonesia

Managed social research and FPIC implementation for nature-based carbon projects, leading multidisciplinary field teams and coordinating engagement with communities, government institutions, and project partners. Conducted socio-economic assessments, facilitated participatory consultations, and ensured compliance with social safeguard principles through inclusive, rights-based stakeholder engagement. Delivered research findings and strategic recommendations to support project development, risk management, and sustainable community partnerships.

Associate Facilitator 06/2025 - Present

Digdaya Citta Selaras

Support the design, facilitation, and evaluation of capacity-building programs for strategic partners across the public, private, and civil society sectors. Collaborate with multidisciplinary teams to deliver participatory learning initiatives, facilitate stakeholder engagement, and strengthen organizational and community capacities through evidence-based approaches.

Community Development Staff 01/2024 - 04/2025

PT Alam Belantara Makmur (Triputra Agro Persada Group)

Lead community engagement and stakeholder relations to support forest carbon projects by building trusted partnerships with local communities and government stakeholders. Contribute to the implementation of social safeguard, community development, and livelihood programs that strengthen project sustainability while creating shared value for communities and the business.

Cluster Coordinator 01/2023 - 12/2023

Gaia Adhi Pranacitra (Anama)

Coordinated Social Impact Assessment (SIA) activities for industrial forestry projects, ensuring compliance with social safeguard standards, regulatory requirements, and sustainability commitments. Led stakeholder engagement, managed multidisciplinary field teams, assessed social risks and impacts, and developed mitigation and management plans to support responsible operations in socially and environmentally sensitive areas.

Field Coordinator 01/2022 - 12/2022

Gaia Indonesia

Led the implementation of Free, Prior and Informed Consent (FPIC) processes, ensuring meaningful, inclusive, and culturally appropriate engagement with local communities in accordance with international human rights and environmental safeguard standards. Coordinated field operations, facilitated multi-stakeholder consultations, and managed community relations to support responsible project development in socially and ecologically sensitive areas. Worked closely with multidisciplinary teams to identify social risks, strengthen stakeholder trust, and promote participatory decision-making throughout the project lifecycle.

Field Coordinator 08/2021 - 07/2022

Gaia Indonesia

Led the Social Impact Assessment (SIA) of communities surrounding Industrial Plantation Forest (HTI) concessions in Riau Province. Coordinated field research to assess the social impacts of HTI operations, analyse community perceptions and responses, and evaluate the effectiveness of community development and empowerment programmes implemented by concession holders. Managed field teams, ensured data quality, facilitated stakeholder engagement, and contributed to evidence-based recommendations for improving social performance and sustainable community relations.

Field Researcher 10/2019 - 05/2020

Gaia Indonesia

Conducted Social Impact Assessment (SIA) field research in communities surrounding Industrial Plantation Forests (HTI) in Pelalawan, Riau, using ethnographic and qualitative research methods. Assessed the social impacts of plantation operations on local livelihoods, social dynamics, and community well-being. Collected and analysed socio-economic data, engaged with diverse stakeholders, and produced evidence-based findings to support social risk assessment and sustainable project planning.

Data Analyst 10/2018 - 10/2019

Hakasasi.id

As a Data Analyst at Hakasasi.id, I analysed qualitative and quantitative data related to human rights and the Sustainable Development Goals (SDGs). My responsibilities included collecting, managing, and interpreting data, conducting policy and trend analysis, producing evidence-based insights, and supporting the development of research reports and strategic recommendations to strengthen human rights advocacy and sustainable development initiatives.

Sociology Teacher 07/2016 - 07/2019

Pondok Pesantren Luhur Al-Tsaqafah, Jakarta Selatan

Taught Sociology to senior high school students, fostering critical thinking and sociological perspectives on social issues, culture, and social change. Developed lesson plans, facilitated interactive classroom discussions, assessed student performance, and mentored students to strengthen analytical and communication skills.

Researcher

05/2016 - 07/2017

AWC-Universitas Indonesia for Peace and Humanities

Conducted qualitative research for the Abdurrahman Wahid Center for Peace and Humanities, Universitas Indonesia, in collaboration with the Program Peduli, to examine the citizenship experiences of adherents of indigenous belief systems (ancestral religions) in Indonesia. The research explored patterns of social exclusion arising from societal stigma and discriminatory state policies, with particular attention to barriers in accessing public services and the protection of civil rights. Findings contributed to evidence-based policy discussions on social inclusion, human rights, and equitable public service delivery.

Journalist

08/2015 - 03/2016

MNC KORAN SINDO

Reported and produced news coverage on major national issues across politics, economics, law, and social affairs. Conducted interviews, verified information from multiple sources, and delivered accurate, timely, and balanced reports under tight deadlines while maintaining high journalistic and ethical standards.

Research and Development Staff 01/2015 - 08/2015

MNC KORAN SINDO

Reported and produced news coverage on major national issues across politics, economics, law, and social affairs. Conducted interviews, verified information from multiple sources, and delivered accurate, timely, and balanced reports under tight deadlines while maintaining high journalistic and ethical standards.

Researcher

01/2014 - 12/2014

AWC-Universitas Indonesia for Peace & Humanities

Served as a Researcher at the Abdurrahman Wahid Center for Peace and Humanities (AWC), Universitas Indonesia, contributing to a research project on inclusive local governance in Indonesia. The study examined innovative governance practices at the subnational level, focusing on how local political leadership promoted social inclusion, particularly for minority and marginalized groups.

Conducted qualitative research, including literature review, field data collection, stakeholder interviews, and policy analysis, to examine the relationship between local leadership, governance innovation, and regulatory frameworks. The research demonstrated how local governments could advance inclusive public policies through political commitment and adaptive governance, despite institutional and regulatory constraints.

The project findings were published by UI Press in the book Tatakelola Pemerintahan Inklusif dan Inisiatif Lokal: Tiga Kasus Kabupaten Wonosobo, Kota Surakarta, dan DKI Jakarta.

Field Researcher

01/2013 - 12/2013

Tempo Institute

Conducted field research for a national journalistic research project led by Tempo Institute in collaboration with the Center for Health Promotion, Ministry of Health of the Republic of Indonesia. Collected and analysed qualitative data to assess public understanding of health promotion programmes, community participation in health development, and the effectiveness of local health systems across multiple regions. Produced evidence-based findings through independent, balanced, and ethical field reporting, highlighting both successful practices and existing challenges to support policy learning and strengthen future health promotion initiatives.

Research Assistant

09/2010 - 10/2012

Departemen Antropologi Universitas Indonesia

Served as a Research Assistant in a collaborative research project between the Department of Anthropology, Universitas Indonesia, and the Indonesian Academy of Sciences (AIPI). Conducted ethnographic research for the Bisa Déwék project, which examined the identity formation and institutional strengthening of rice breeder farmers affiliated with the Indonesian Integrated Pest Management Farmers Association (IPPHTI) in Indramayu, West Java.

Carried out field research across 11 sub-districts using ethnographic methods, including in-depth interviews, participant observation, and stakeholder engagement. Collected and analysed qualitative data to understand farmers' knowledge systems, collective identity, agricultural innovation, and community-based resource management, contributing to research findings and project reporting.

Education

Universitas Indonesia 08/2018 - 07/2021

Master's degree, Anthropology

Universitas Indonesia 08/2005 - 01/2012

Bachelor's degree, Anthropology
